

Spring is right around the corner, and it is an exciting time at North Montco Technical Career Center . We are in the process of accepting bids for a \$12 million renovation project which will enhance the technical education offered at North Montco Technical Career Center .

The renovation project will begin by the summer and many areas of the school will be under construction throughout the summer. **We have decided to cancel the summer camp program this year and for the summer of 2011 because of safety concerns for the children while the construction is taking place.** It is our goal to hold summer camp in the future so your children can experience the new North Montco Technical Career Center .

We thank you for your past participation and interest in North Montco Technical Career Center 's summer camp, and look forward to seeing you when the construction is completed.
